CASE TRANSFER

Effective today, when you electronically transfer a docketed case to another magisterial district court, the case will transfer immediately rather than process during overnight hours. Since all transfers will now go immediately, the "RUSH" transfer code has been removed as an action code on the Transfer a Case screen.

After a case is transferred, the receiving court will receive a Received Case Report on the printer. The report will provide you with the docket number, case title, sending office, filing date, and when applicable, the commitment date, release date, and OTN. The receiving court will no longer accept the case through the Receive a Rush Transferred Case option; the case will be docketed in the receiving court without user action.
