RELEASE OF PRISONER

One copy of a Release of Prisoner form (AOPC 602) will now generate when you commit a defendant with the Reason Code C (Bail Not Posted). Include the form with other bail related documentation being sent with the defendant to the prison/jail.

A new reason statement, "When Bail is Posted," and check box has been added to the Release of Prisoner form. The box will contain an "X" when the form generates from the Commitment screen with the Reason Code C. This gives notice to the prison that the defendant is to be released from custody when bail is posted. In addition, the title for the signature line will print "Bail Authority/Witness" rather than "Magisterial District Judge" when the Release of Prisoner generates for commitments with Reason Code C.

SUBPOENA PROCESSING

Effective July 12th, copies of the Subpoena form will no longer generate for attorneys maintained on a docketed case. In addition, the program has been modified to generate only one MDJ copy of a subpoena regardless of how many individuals are being subpoenaed on a case.
