ISSUING WARRANTS

Effective August 31, 'Mag. Dist. Judge' will be removed as an 'Issue To' option when issuing a warrant since the authority to issue a warrant to a judge is not provided for in the existing legal authority. This follows discussions with the Criminal Procedural Rules Committee and the Office of Auditor General when they expressed concerns that warrants were being issued to a judge in order to make the warrant active when there is no intention of actively pursuing the serving of the warrant. It is anticipated that the topic will continue to be discussed at the next Criminal Procedural Rules Committee meeting. In the meantime, out-of-state warrants and warrants to be served to another county must be issued to a constable, officer, or arresting agency with a valid ORI. The MDJ can determine if they should subsequently be recorded unserved.

JNET ACCESS

AOPC has resolved the JNET access problems that have been reported over the last few weeks. If you continue to have a JNET access problem or encounter an error due to certificate validation, please call the help desk so that we can resolve your issue.
