PAYMENT DETERMINATION AND TICKLERS

When a payment determination hearing is scheduled, the MDJS will no longer require you to cancel an active warrant. In addition, if the case is on a tickler list, the case will not be removed as the result of scheduling a payment determination hearing.

REBOOTING COMPUTER (THIN CLIENT)

Always leave your thin clients powered on. During the continuing migration of district courts to the new MDJS various images of the MDJS including legacy, rewrite, and training icons for the systems exist. The Citrix team is regularly deploying these images to thin clients in preparation for a court's training on the MDJS or for a district court who is going live on the new MDJS.

If you power on the thin client while the Citrix teams are pushing out images, you may receive the incorrect icons. AOPC can fix this for you, but in order to avoid the issue, please call the Help Desk before powering on your thin client in instances of power loss.
