NCIC COMPLIANT VEHICLE TYPE CODES

The "Type" field on the Traffic Case Entry screen now contains an F4 code list that complies with NCIC standards. Informational laser fax 5.106 on August 12th first notified you of this change. If you need a print the codes and descriptions that appear in the F4 pop-up window for your reference or distribution, you can still access the document in the Statewide folder.

AOPC has also run a conversion program that updated the "Type" field on existing docketed cases to the NCIC standard code, based on mapping rules.
