Modification 5
Modification 5.87
February 24, 2009

CHECK MAINTENANCE

The Check Maintenance pop-up window that displays when you are voiding an unprinted check or an outstanding deposit will no longer show previously voided entries. This change is the result of user suggestions to make the search more efficient.

CRIMINAL COMPLAINT NUMBER

You are now prevented from modifying the Complaint/Incident No. field on the Criminal Court Entry screen if an active warrant exists on the case. The field is an important identifier when warrant data is sent to CLEAN/NCIC so status changes for the active warrant must contain the same complaint number as the original electronic message.

FINGERPRINT ORDER COPIES

As stated in Modification 5.85, if the question on the Criminal Complaint Entry screen indicates that the defendant was not fingerprinted, the system will advance you to the Fingerprint Order screen from the Summons Entry screen. After you complete the Fingerprint Order screen, the system will now generate two defendant copies of the Fingerprint Order to be included in both the first class and certified mailings to the defendant.
