INTERESTED PARTY CODES

The codes that display in the F4 pop-up window in the IP Type field are now specific to the docket type. For example, CPAT (Complainant's Attorney) can no longer be maintained as an IP (Interested Party) on a traffic docket. In order to determine which codes are valid, we completed statistical and procedural analysis. Contact the MDJS Help Desk if you are concerned about an IP type which is no longer displaying for a particular case type.

In preparation for the future migration of data, we need to ensure that proper codes are being used so that data will display correctly in the new system. We anticipate that more of these changes will occur and you will continue to be notified prior to any modifications. As always, your cooperation and understanding are appreciated.
