#### Notes on Analysis:

**CASELOAD:** The statistics provided are used to compare the average annual caseload of each magisterial district to the class of county average as one measure to assess whether any changes should be proposed. Reported values are provided by the judicial district; the comparison values are provided by the MDJS.

**WORKLOAD:** Where the average annual workload of a magisterial district is greater/less than 15% of the judicial district's workload average, the judicial district should realign - OR - explain why this difference does not impact workload equity within the judicial district. A value that is green indicates it is within range; red requires justification if realignment or elimination are not proposed.
