We walked between two groups of young people about the same age. On the park side were the cheer for Gene youth with love in their eyes. On the street side were soldiers with fixed bayonets and fear in their eyes. If it wasn't for the singing led by the performer, who had played Tevya whose name I don't now remember, someone may have set off the soldiers and we would all have been killed.

There's a lot of anti-city, anti-NYC and anti-intellectual people in this world. A teacher in Oklahoma is being threatened with loss of her teaching certification for giving her students the phone number for online books from the Brooklyn public library. A once famous book was titled "A Tree Grows in Brooklyn"; minds grow there too.

**Ryan Walters**  
Office of the Secretary of Education

**Oklahoma State Board of Education:**

In light of recent events leading to the subsequent firing of Norman High School English Teacher Summer Boismier, I am asking the Oklahoma State Board of Education to revoke her teaching certificate immediately. There is no place for a teacher with a liberal political agenda in the classroom. Ms. Boismier's providing access to banned and pornographic material to students is unacceptable and we must ensure she doesn't go to another district and do the same thing. This action must be dealt with swiftly and with respect to all our kids and parents.

Teachers are one of our state's greatest assets and it is unfortunate that one of them has caused such harm and shame for the entire profession. This type of behavior will not be tolerated in Oklahoma and I speak for parents across the state who are demanding swift and immediate action.

Kids first.

Despite the support of Baer, Gov. Tom Wolf and many others, the legislature still has not raised the minimum wage above the current \$7.25 level. When Pa. raised the minimum wage to \$7.15 (10 cents less than the federal level, which ultimately followed), under my leadership in 2006, I immediately advocated that it should soon go up to \$8.00. Judge, i think you have the headline wrong. Perhaps, "NYT uses attorney-client communications apparently improperly leaked by the January 6 Committee to baselessly attack President Trump's Philadelphia based legal team" 1. does it concern you that attorney-client communications are being leaked by the Committee? Do you think this undercuts the Rule of Law in America, which includes the right to engage counsel? 2. Do you see much difference between Congress improperly leaking attorney-client communications and the US Supreme Court employee improperly leaking the draft decision on Roe? Doesn't this conduct undermine confidence in our political and legal systems?

It seems that it would be an abuse of power to use the subpoenas for political, rather than investigative, purposes. Of course, there is a bigger institutional picture here. If the Democrats do this, then the Republicans are likely to do the same when they take control after the midterms. It is not good for the institution, the country, or the judicial system.

**Ed Doogan** the attorney client privilege does not apply to legal advice designed to further a fraud or crime. But nothing in the article, or the email attributed to me, suggests that I was part of a fraud or a crime. I did disagree with the characterization of a "fake elector" scheme. In 1960, the Democrats sent an alternative slate of electors to DC while contesting the Kennedy-Nixon race. This precedent was followed by the Trump campaign in 2020 (with the caveat that I was not personally involved in the elector documents from Pennsylvania or any other state). The problem is that the Democrats and left wing media conflate different issues as part of their alleged "Big Lie". There are significant legal differences between the alternative elector program (which is what the Democrats did in 1960), falsely claiming fraud (as opposed to raising legitimate Constitutional and legal issues as I did in the US Supreme Court petition), and the advice given to Trump that the VP had the Constitutional authority to reject electors (in which I had no involvement and disagree legally, although I don't think Professor Eastman giving incorrect advice which he thought was correct is a crime).

Like 13

Legitimate constitutional and legal questions that were thrown out of court 64 times? And your attempt to make what happened in 1960 analogous to what happened in 2020 is ridiculous on its face. The only thing analogous is that republicans lost an election and blamed voter fraud instead of a repudiation of their candidate. ~~300~~The 1960 presidential election in Hawaii was in the middle of their mandated recount and two states of electors were ready depending on who won. It was Nixon himself ( never known to be above dirty tricks ) who said that the democratic electors from Hawaii should be seated.

As I said earlier, republicans had 64 opportunities to present evidence that there was voter fraud on a scale big enough to affect the outcome of the election and just like in Chicago 1960 they provided none. There were also recounts in several contested swing states including PA where we both love. The extremely far right Supreme Court even found that your case had no merit. At least Nixon was man enough to admit defeat instead of almost destroying our government. And Professor Eastman KNEW that the theory he was proposing was illegal. Nice try genius.

**Bruce Marks** The NYT says you took part in the scheme to propose fake electors. That was immoral and dishonest. Illegal, too? Well there are some pretty smart lawyers who are claiming that the entire Trump effort to encourage Pence to block certification of PA's electors was fraudulent. And if the fake electors were chosen to encourage that fraud. then yes you were part of it.

I think you are all a bunch of traitors to our country.

If you were capable of shame you would know that too. At any rate, if we can save this country from your fascist party, you will go down in history as successors to the confederates. Guess again dumbass. In the Hawaii case the two slates of electors were sent because the electoral college was counted early in December and it was Hawaii's first presidential election and they were still in the middle of recount even though Hawaii's electors had no affect on the outcome. 64 court cases weren't enough if they would have just listened to one more time.

"Voters, not lawyers, choose the President. Ballots, not briefs, decide elections," the judge wrote. Bibas was one of three judges on the Circuit Court of Appeals panel that consisted entirely of GOP appointees.

The judge's opinion was announced Friday afternoon and sided with a district court ruling that also rejected it."

If republican nominated judges rejected other arguments , 64 court cases were rejected in total and your brief was rendered moot because it was too late then only an absolute moron would think they still had a leg to stand on.

Whatever they find is if major public import, but it should be done within the standards of the House of Representatives, about which I am not expert. The attorney-client privilege varies from state to state, and is aimed at court proceedings. The January 6 Committee is not a court. And as a judge, I am limited in the degree to which I can comment on political actors, attorneys or judges in court proceedings.

Bad news for Texas kids and school boards. Perhaps good news for Texas educators: Future pay raises and working conditions.

# Poll: 77% of Texas teachers want to quit

By Edward McIntire

It's not surprising that many teachers in Texas are considering leaving the profession. A recent poll by the Texas Education Agency (TEA) found that 77 percent of teachers surveyed said they would like to quit their jobs if they could.

The poll, which was conducted by the TEA's Center for Public Policy, surveyed 1,000 teachers across the state. The results show that 77 percent of teachers would like to quit their jobs if they could.

The reasons for wanting to quit are varied. Many teachers cited low pay, lack of respect, and poor working conditions as the primary reasons for their dissatisfaction.

Other factors mentioned include the need for more resources, better training, and improved student behavior. The poll also found that 68 percent of teachers would like to see their pay raised.

The TEA's Center for Public Policy is a research organization that provides information and analysis on public policy issues. The center's findings are based on a representative sample of the state's teaching force.

This speaks for the views of many workers.

It seems like the less education someone has the less they value an education. They don't seem to realize an educated population benefits everyone. So if everyone is benefiting, shouldn't everyone pay?

I can't get it. No one protested when we bailed out the big banks. I'd rather help a student any day. As for "they should have known what they were getting into." You think Citi didn't know what they were doing. That was about greed. This is about building a future.

I paid off my relatively modest undergraduate student loans a few years ago, and I'm thrilled that at least some other people won't have to do the same. Higher education—which benefits our whole society—should be free.

# Tennessee law makes it illegal to teach Black history in K-12

It is a disgrace that Tennessee has passed a law that makes it illegal to teach Black history in K-12 schools. This is a clear attempt to suppress the truth and to promote a distorted view of our nation's past. Black history is an integral part of our American identity, and it is essential that we teach it to our children. The law is a direct assault on the rights of Black Americans and on the principles of equality and justice. It is a shameful act that reflects the deep-seated racism and bigotry that still exist in our society. We must stand up to this law and demand that it be repealed. Black history is not just a story of pain and struggle; it is a story of resilience and triumph. It is a story that has shaped our nation and that continues to shape us today. We must not allow this law to silence the voices of Black Americans and to erase their contributions to our country. We must ensure that our children learn the full and honest truth about our nation's history.

### What is real intent behind law?

While we should be glad that Tennessee is finally outlawing the teaching of racial superiority in any form, our legislators should have passed this part of its legislation 60 years ago when it would have counted for something.

Right up into the 1960s public schools in Tennessee openly and proudly chain-tethered themselves as superior even as they characterized Black people as lacking in morality as being here irresponsible and untrustworthy. It is a disgrace that Tennessee has passed a law that makes it illegal to teach Black history in K-12 schools.

### New CRT law is about erasure

With their anti-CRT law, our state leaders are desperately attempting to cut off the discussion. Conservatives leaders and much of our had the states in the Union have deliberately raised a barrier over the truth about the crime of "Original Sin" only because they fear honestly naming their real target: teaching Black History.

You cannot teach Black History - the history of this country from the perspective of Black people - without calling into question everything we know about ourselves and about our nation.

Our government signed this legislation on May 25, one year to the day after the murder of George Floyd. Criticism should be easy, but one which highlights the real purpose of this legislation. As Princeton University's Kenneth Surin has noted, the anti-CRT efforts are really about undermining the Democratic Party's government of Black and white, which emerged following the 2020 election.
